

Interfaces Name	Type	Header	Params
register	post		email, password
login	post		email, password
token	post		userId, token
reset-password	post		email, oldPassword, newPassword
new-activity	post	userId, token	folderId, questName, questTypes, activityId, realmId, resourceUrl, fileIds
map-curriculum	post	userId, token	activityId, questName, questTypes, resourceUrl, ingameLink, questionSpoken, realmId, topicId, keyConceptId, contentDescription, outcomes, yearLevelIds, ageRangeId, audienceRoleIds, scientistId, fieldId, mapName, mapEmail, curriculumIds, folderId, realWorldConnection, purposId, authorTitle, institutionId, authorEmail, authorPhone, countrysId, mapPhone
new-activity/get-exist-folder	get	userId, token	
new-activity/new-folder	post	userId, token	folderName
new-activity/get-exist-realm	get	userId, token	
new-activity/new-realm	post	userId, token	realmName
new-activity/get-exist-topic	get	userId, token	
new-activity/new-topic	post	userId, token	topicName
new-activity/get-exist-keyConcept	get	userId, token	
new-activity/new-keyConcept	post	userId, token	keyConcepyName
new-activity/get-exist-purpose	get	userId, token	
new-activity/new-purpose	post	userId, token	purposeName

new-activity/get-exist-ageRange	get	userId, token	
new-activity/new-ageRange	post	userId, token	ageRangeName
new-activity/get-exist-scientist	get	userId, token	
new-activity/new-scientist	post	userId, token	scientistName
new-activity/get-exist-institution	get	userId, token	
new-activity/new-institution	post	userId, token	institutionName
new-activity/get-exist-field	get	userId, token	
new-activity/new-field	post	userId, token	fieldName
new-activity/get-exist-country	get	userId, token	
new-activity/new-country	post	userId, token	countryName
get-curriculum	get	userId, token	page, pageLimit, subjects, yearLevel, code
activity-pool	get	userId, token	page, pageLimit, status, questTypes, learningAreas, generalCapabilities, folderIds
activity-pool/:activityId	get	userId, token	activityId
upload-file	post	userId, token, binary stream of the file	
attach-files	get	userId, token	activityId, fields, folderId
get-file	get	userId, token	fileId, activityId
